Brutus Wheeled Transporter

Designed to perform in roughest, most rugged conditions and tough enough to handle every inspection need. The Brutus crawler is the most powerful tool for inspecting pipelines from 8" to 96" diameter. If conditions get too thick even for the Brutus, the clutch automatically disengages when the power supply is cut enabling the retrieval with no damage to the unit.

The Brutus can not only handle any obstacle it can travel distances over 2,000 feet from a single entry point. Gone are your days of digging to retrieve stranded dequpiment. Track farther, dig less and inspect more with the Brutus crawler.

Titan Steerable Storm Tractor

ARIES continues the tradition of manufacturing innovative products for the pipeline televising industry with the Titan steerable large line transporter. The Titan tractor is a large pipe, all wheel drive inspection camera carrier to inspect pipes from 21" to 200" or box culverts up to 12' x 12'.

The Titan is specifically designed to meet the toughest of operating conditions encountered in large pipe and storm drain inspection. The Titan allows entry into manholes as small as 19" diameter . The large all-terrain 19" diameter tires let the Titan drive over, around, and through almost any condition found in the pipe.

The most outstanding features of Titan are the remote steering capabilities with 360 degree turning radius and the dual one-quarter horse power continuous duty motors. These features, make Titan the most versatile large line tractor from in the industry. Four-wheel drive and independent control enables it to negotiate the most difficult terrain.
