Ultra Mini Pan & Tilt Camera

The Aries Ultra Mini Pan & Tilt Camera is the newest in the line of Aries versatile Pan & tilt Cameras for the inspection of pipes of 4" diameter upwards. The camera head can quickly locate any desired viewing direction without any mechanical stops. The high intensity LED lighting system with shock-resistant, light covers ensures optimal illumination of the field of view. The Ultra Mini Pan & Tilt Camera has a built-in 512Hz Sonde as a standard for locating camera position from above ground.

The Aries Ultra Mini Pan & Tilt Camera can be operated with all Aries tractors or the self contained Seeker Push Camera system and the new and improved LETS Lateral Evaluation Television System).

Pathfinder Pan & Tilt Camera

The Pathfinder is an ultra light sensitive camera that offers a maintenance- free LED lighting system for illuminating pipelines from 4"-24" in diameter. For larger diameter pipes an auxiliary lighthead is available for dimeters up to

96". ARIES has maintained our Pan & Tilt's technical advantage to rotate 360° continuously in a single direction. Equipped with a newly designed arm and head design, ARIES Pathfinder Pan & Tilt is rugged, and built to protect internal components against exterior shock.

Pathfinder PFZ Zoom Pan & Tilt Camera

The Pathfinder PFZ Camera with Laser Diodes combine the latest and only laser beam technology calculating and displaying the margin of error according to the diameter of the pipeline with accuracy of ± 0.02 mm. in 8 " diameter pipe. With the advanced electronic caliper and measuring pipe joints; cracks, defects, debris and other defects within the pipeline is only a click mouse click away! The PFZ offered by ARIES Industries is the next generation in Pan & Tilt cameras by offering industry solutions through technological advancements.

Illumi-Zoom Pan & Tilt Cameras

Increase your pipeline inspection capabilities with our Illumi-Zoom Pan & Tilt Camera. The Illumi-Zoom offers superior camera performance and light sensitivity for 6" and larger diameter line sizes. The built-in "SMARTEK" diagnostics system will insure greater reliability by continually monitoring the camera's crucial internal operating system. Upgrade your existing camera system with ARIES Illumi-Zoom pan & Tilt with no modifications required.

ThermaView IR Pan & Tilt Camera

ARIES patented ThermaView IR Pan & Tilt Camera totally changes the pipe relining industry. In considering your job requirements, ARIES has developed the first and only sewer dual-mode CCTV/Thermal imaging camera available. ThermaView IR is not only your standard day-to-day pipeline inspection Pan & Tilt camera, but is also used when searching for hidden laterals, or hidden infiltration. Simply activate the thermal imaging mode and the lateral or infiltration will be evident based on incremental temperature changes and the sewer lateral and or infiltration will be evident.
