## Pathfinder

Wondering how to inspect relined 6" pipe? ARIES Pathfinder Mini Transporter is what you are looking for. This transporter, combined with a variety of cameras and built in a standard camera lift, will work in pipe sizes from 5" to 24". Simple wheel changes allow for quick adaptation to multiple pipe sizes and integrated long-life LED auxiliary lights keep the profile low.

### Pathfinder Benefits & Advantages

- The body is brass and stainless steel for long life
- The tractor includes (2) internal brushless motors, each with electronic clutch, that allow forward and reverse drive, as well as left/right and freewheel functions
- The tractor has a standard integrated rear viewing color camera with LED lighting to eliminate operating blindly when in reverse or when pulling the tractor back with the reel
- The Pathfinder's Fast-Check pressure sensor circuitry to monitor the internal pressure of the tractor, and an external red LED to alert the operator in the event of pressure loss at all times.
- This Lightweight unit weighs only 25 pounds but it is built with the quality and durability that you have come to expect from ARIES

## Pathfinder XL

If debris has gotten between you and a smooth pipeline inspection, ARIES New Pathfinder XL transporter is what you need to take you places you have never been before. With heavily treaded wheels and a fully loaded - up to 90 lbs of "presence" - the Pathfinder XL will plow through the toughest of conditions.

### The Pathfinder XL offers:

- Standard and electric remote camera lift
- Built in LED auxiliary lights
- On board 512 Hz locating beacon
- Built in tilt-and-roll inclinometer
- Rear facing camera in rear cable connector to give you an unequaled 360 degree view of the pipe

The XL will handle all new Pathfinder cameras as well as the [Saturn Mini Camera](#) for a low cost highly reliable back up camera. The Pathfinder XL is the only transporter with an automatic camera lift that will operate in a relined 8" diameter pipe. Coupled with the ability of this transport to operate with either wheels, cleated tracs or solid polyethylene bands, this transporter gives you the strength, performance and reliability that you need.
