Color & Infrared Pole Camera

ARIES Color/IR Pole Camera is an economical portable inspection system designed to be a complete hand held confined space inspection camera, which provides high quality video as a stand-alone system or that can be used in conjunction with any TV inspection systems monitor, VCR or digital capture unit, saving you even more money.

The Color/IR Pole Camera operates with any TV system, multi or single conductor. This highly portable and economical system allows the operator to inspect pipelines, manholes, tanks, or other internally confined space entries. The full color/infrared video module design allows inspection with a low wattage LED lighting. Customer choice packages allow you to choose the right package for your needs.

Zoom Pole Camera

ARIES Zoom Pole Camera system is a highly versatile, quick inspection system that can be used to identify possible problems in a pipeline before a CCTV inspection, or help identify areas that require maintenance. ARIES high resolution camera module used in conjunction with the **432:1 zoom ratio** and high intensity detachable LED lighthead, which allows you to see details that other cameras miss.

The zoom pole camera's wireless operation makes the system extremely versatile and allows you to take it anywhere and transmit video. When this system is used with the optional media case with 10" day light readable screen, it allows the user to inspect any pipe anywhere you can get to. For more versatility virtually any reporting software can be added to greater enhance the systems capabilities.
